A Quiet Revolution: The Veil's Resurgence, From The Middle East To America

Synopsis

In Cairo in the 1940s, Leila Ahmed was raised by a generation of women who never dressed in the veils and headscarves their mothers and grandmothers had worn. To them, these coverings seemed irrelevant to both modern life and Islamic piety. Today, however, the majority of Muslim women throughout the Islamic world again wear the veil. Why, Ahmed asks, did this change take root so swiftly, and what does this shift mean for women, Islam, and the West? When she began her study, Ahmed assumed that the veil's return indicated a backward step for Muslim women worldwide. What she discovered, however, in the stories of British colonial officials, young Muslim feminists, Arab nationalists, pious Islamic daughters, American Muslim immigrants, violent jihadists, and peaceful Islamic activists, confounded her expectations. Ahmed observed that Islamism, with its commitments to activism in the service of the poor and in pursuit of social justice, is the strain of Islam most easily and naturally merging with western democracies' own tradition of activism in the cause of justice and social change. It is often Islamists, even more than secular Muslims, who are at the forefront of such contemporary activist struggles as civil rights and women's rights. Ahmed's surprising conclusions represent a near reversal of her thinking on this topic. Richly insightful, intricately drawn, and passionately argued, this absorbing story of the veil's resurgence, from Egypt through Saudi Arabia and into the West, suggests a dramatically new portrait of contemporary Islam.

Leila Ahmed is the Victor S. Thomas Professor of Divinity at Harvard Divinity School. She is the author of "Women and Gender in Islam" and "A Border Passage: From Cairo to America--A Woman's Journey." She lives in Cambridge, MA.

As other reviewers have noted, veiling gets less attention in this book than might be surmised from the title. Ahmed began the research that led to this book as a study of veiling, but the final product is really a book about modern Islamic socio-political activism, which Ahmed calls "Islamism" in keeping with academic usage, and of which veiling had been a typical manifestation. Ahmed traces its emergence in Egypt with the rise of the Muslim Brotherhood, its transmigration onto US soil and its eventual transformation into a distinctly American brand of civic-minded Islam. What I found particularly compelling is the internal plot of Ahmed's changing perceptions. She starts by intimating the us-vs-them attitude toward Islamists prevalent in the cultural milieu to which she belongs. She doesn't romanticize this movement along the way, but as she shares with the reader new things she learns about it, her surprise is sometimes palpable on the page. When the book ends with a sort of tribute to the Muslim American activists who are heirs to the Islamist tradition, one can't help being impressed both by the happy ironies of history and by Ahmed's remarkably open mind.

The focus of this book is on modern Egypt and then America. That makes it very timely. In some ways the modern history of Egypt overwhelms the focus on the veil, but that is appropriate. The veil

should not be the primary focus, since it is a sign and representation of a larger political context. that is the point. In the latter part of the book the focus shifts to America. Here again the veil is put in the context of a much larger development of Muslim society in America - if one can speak of "a" Muslim society. My one concern with this book is that she refers to the leadership of the largest Muslim organizations in America, generically, as Muslim Brotherhood. I see the point that she is making. The form of Islam that has become normative in the Islamic Society of North America has an intentional piety that might be associated with the Muslim brotherhood in Egypt. I question how accurate it is to carry that description over to America, as if somehow various American Muslim organizations are extensions of the Muslim Brotherhood in Egypt. They are not, even if some of the practices look similar. This book is rigorous in its research but at the same time personal and sensitive.

I was curious about the issue of women choosing to wear the veil particularly in Egypt in the 1970's and this book did a very good job illuminating the circumstances where women made the shocking-at-the-time choice to adopt the veil. This is a very quick and easy read.

I thought this book was going to concentrate more on the hijab subject, but what it mainly talks about is the history of Egypt's colonization and the Muslim brotherhood. I feel that it barely talks about the hijab revolution as it says. I am happy to be able to understand more about Egypt's development, but don't think this book has the correct name.

I like when Ahmed writes about women's lives and stories - she gets too bogged down in academia, she gives the whole history of the Muslim Brotherhood, and while interesting, not what I had expected. Had to put it down, will get back to it when I want a history lesson. A good reference book, just overly detailed on what I thought were esoteric topics.

This book is an incredibly well written history and well backed argument about the resurgence of the veil now and the reasons for the veil in the past and today. I can honestly say that Leila Ahmed has changed my perspective about veiling and the Muslim religion's connection to people. She gives reams upon reams of evidence and facts about the veil and the women who do or do not wear it. I would recommend this book to anyone looking to widen their perspective or to simply learn more about muslim women in the Middle East and America.

This is an illuminating, well researched and written book that will ever be a favourite of mine. The fact that the resurgence of the veil is partly driven by Muslim women wanting to make a statement of a proud identity is not a surprise to me. It is also not a surprise that it is for some women in the Muslim world, influenced by Muslim men and their particular strain of belief and politics. Muslim women are no different to us in this way they are influenced by their men. No-one can deny that we western women dress to please our men, but we focus on getting their attention and many of us in the wrong way. It is fascinating though that the motivations are so opposed. The Hijab appears extreme to us and it is in comparison. Although since I have been learning and opening my mind, the more beautiful I find it. Just for the record though, I am one who does not approve of our young women presenting themselves in society like Las Vegas Hookers from a very young age, but that's just me. The history of the resurgence of the veil is an efficient reflection of recent Middle Eastern history, coupled with Muslim women's now growing rejection of many elements of the western lifestyle. In my opinion this is very understandable given that western dress was an influence virtually forced upon their societies through unwanted colonisation, aggressive annexing and brutal warfare. This was all the time fuelled by a stream of callous greed and strategic alliances forged for the protection of western interests with no regard for the safety, rights or sensitivities of the local people. Whilst the book is completely non-political in its intent, once you read and reflect upon what has happened in the last century alone, one cannot help sympathise with the innocent mainstream of people in the Middle East and what they have endured at the hands of the rest of the world and that it has built understandable mistrust and resentment. The Middle East have rarely had any respite from outside power and influence and when they have they have shown, in my opinion, that they simply want what the rest of us do, peace, freedom and the right to worship as they wish. This book highlights the resurgence of one of the most arresting and confronting visible identities of Islam as a "ladylike" show of pride in their identity and a stand for their right to firstly please their God and then themselves.
