Customer Reviews

Another Baby Professor book with some cool pictures. There are about 200 books in this ebook series that are offered in the kindle store for either free or for .99. You can't really go wrong with the books offered for free. There is a variety of subjects covered and most of the books follow about the same format. You can take a peek inside the books by clicking "Look Inside" and this is pretty much what you get in each book. This particular book is nice and the photos are fantastic. The format for this book is a little different than most of the Baby Professor books in this series which have a picture with a paragraph and facts on one page. Then the next page is just a photo. This book is nice because each page is its own "fun fact." Honestly, I was originally

disappointed because I expected this book to have maps in it instead of a picture (very vivid pictures by the way) and the fun fact. But I've come to expect this from Baby Professor. But this book is offered for free right now and I can easily have my kids pull out a globe as we read or do a search on the internet to find the place the book talks about. Also, I probably wouldn't say this is 6th Grade geography because both my 4th and 2nd grader will easily be able to navigate and enjoy this book. Ideally, Baby Professor should have had a little picture of the globe on each page and highlighted each place it talked about. Anyway, overall, I do like these books for their wonderful pictures. It would be nice if the books went into more detail but they are very basic books that I hope will get my kids interested in finding more about each subject. I plan on keeping these books on my iPad for down time for my kids when they get bored waiting different places like the doctors office or practice for a sibling. I sometimes watch a friends 3 year old daughter and she likes to look through the pictures on my phone. I plan on showing her these books to keep her entertained. I think she will love them. ***** I received this ebook for free in exchange for my honest review. *****

This is an excellent ebook for 6th graders! As a teacher of elementary students, I would love to incorporate this ebook into a small group activity where I present a main idea or topic to the whole class and then they break up in small groups and discover more material on their own. My mind was continuously racing as I read through this book thinking of different projects I could make on this topic. It is the perfect age group to let them use a kindle to explore and what a better way to do so than with this ebook! I will totally let other teachers know of this opportunity and will keep this seller in mind with other ebooks available. I received this product free for reviewing purposes, however my opinions are all my own.

This book puzzles me. How is this geography? This book just has random facts about various countries, places, cities. No rhyme or reason to it. Just because geography happens to be the connecting theme doesn't mean anyone would ever want to read this book. I don't know, I don't get it. The pictures are certainly nice but it is a confusing book. It doesn't teach a whole lot, especially considering this is for the 6th graders - it has to have a bit more meaning, point to it. Sample was provided free of charge for reading and a review.

Daily Geography: Simple Geography Lessons: for the Sixth Grader. "Geography is a field of science dedicated to the study of the lands, the features, the inhabitants, and the phenomena of Earth." "The Rain Forest produces more than _____% of the world's oxygen supply? Ninety % of the world's

ice covers Antarctica. Vatican city is the _____ internationally recognized
 _____ state in the world. Most of the Fresh water on the planet is stored
 _____ Nine of the highest peaks on Earth are located in the
 _____ Two areas of Budapest are separated by the
 _____ river. This land has over 200 active Volcanoes and it has
 a third of the world's lava flows _____ Canada has more
 _____ than rest of the world combined. 25% of the world's trees are found
 here _____ The Nile is considered the _____ of all
 rivers on the planet. The most densely populated city in the world is
 _____ The highest uninterrupted _____ is
 over 979 meters high. At 80 million years old this desert _____ is the oldest
 in the world. The highest mountain in the world is called _____ and
 stands at _____ meters. If you read this book you will be able to fill in all the blanks
 above. Read this gorgeous book about the world's geography, awesome photographs and great
 information. Another wonderful book from the non-fiction children book leaders Baby Professor and
 Speedy Publishing. ****I am grateful to have received this book at a discounted rate for my personal
 honest, unbiased and non-compensated review. Please if you found this review helpful in making
 your decisions, please press the "Yes" button below.
