Customer Reviews

"There is a dearth of information with regard to this topic-particularly in terms of a comprehensive review where all of the most important and interesting information could be in one volume; therefore, this book does fill an important gap in the literature. I would definitely recommend moving forward with this book project."--Daniel Gentry, Ph.D., M.H.A., Associate Professor of Health Management and Policy Dept. of Health Management and Policy, St. Louis University "[T]his compilation and review is both helpful and timely. The book is written for advanced undergraduate and graduate students, as well as established researchers and public health practitioners...[and] provides good coverage of the primary health issues and subpopulations of concern and will serve as a guide and reference on health disparities among gay and bisexual men for researchers and students in a variety of academic disciplines, as well as practitioners and policy makers, for years to come."--Doody's, a 4-star review!

Richard Wolitski is Community Psychologist and Team Leader of the Community Interventions Research Team at the Centers for Disease Control and Prevention. Ron Stall is Medical Anthropologist and Chief of the Prevention Research Branch at the Centers for Disease Control and

Prevention. Ronald Valdiserri is Deputy Director of the National Center for HIV, STD, and TB Prevention at the Centers for Disease Control and Prevention.
