## Customer Reviews

We like Jonathan Park audio books. Great adventure stories without being scary. Some good biblical truths and the EARTH AS WELL.

Although not as well done as focus on the family's ADVENTURES IN ODYSSEY audio dramas,

these bible based adventures provide a myriad of helpful facts and figures of creation science to equip young students to confidently share the creation message to those adherents of evolutionary theory. the dialogue however is quite fast and requires super concentration to take in all the information.

Looking all over for the product and felt fortunate to find this. It was delivered promptly to my grand daughter and she drew me a picture of her playing it in her room. It was so sweet to make her happy and it has kept her busy while she also draws while she listens. thank you for your prompt service

My 11 year old loves Johnathon Park. He listens to a whole CD while laying in bed at night. Quite often he recounts scientific facts that relate to something going on. The biblical message and evidence of God's creation are the most important aspects of this series with the added bonuses of scientific knowledge and entertainment. Highly recommended.

My children ages 9, 7 and 5 listen to Jonathan Park CD's daily. All of the volumes are great. They learn lots of scientific facts and about other places they've never been. Lots of suspense, my children really like that.

These recordings contain so many accurate creation truths right from the historical content of the Bible. If you're looking to introduce a Biblical worldview of science into your child's studies, THESE are a great place to start! Very entertaining!!

My kids absolutely love the Jonathan Park series...we have them all! Start with Volume 1 and work your way up. This one is action-packed and filled with tons of biblical evidence and scientific evidence for Creation. Great for gifts, car rides or just something to do on a rainy day.....turn off the tv and listen to this instead--much more rewarding!

I got this for my son who loves adventure. He LOVES it. I decided to share it with other kids (ages 9-12). I thought it would be more for boys than girls, but I found that BOTH boys and girls LOVE it. It is exciting and educational. I got it for the fun and adventure, but found it FULL of science---painless learning is always best.
