Volcanoes!: Mountains Of Fire (Step Into Reading)

Synopsis

A volcano could be called a sleeping mountain--that is, until it wakes up! What is it like to witness the eruption of one of nature's majestic time bombs? Young readers can learn what makes volcanoes "tick," and read about some of the most famous eruptions in history.

Customer Reviews

These are great books for children learning to read and for children who don't like to read "long" books. Also these books have a ton of information in them that keep my children interested on reading to the next page. I find that my children will read these books over and over again.

Great, interesting learning book. My 7 year old is able to read it just fine.

I purchased this as a gift for my niece and she loves it!!! :)

I am a private tutor and always look for interesting as well as informative books for my youngest

readers. This is an excellent book to use with competent young readers as well as older students who may find reading difficult.

I love the whole Step into Reading series. The information is excellent and they are entertaining. The lower levels are long enough that a beginning reader gets a challenge but isn't overwhelmed with length. Level 4 is good for a confident reader, even if they still struggle with sounding words out. Reading comprehension really begins to get exercised at this level.

This is great -- the science of volcanoes is explained, with wonderful graphics and a very straightforward text. The words are hard but not too hard. The subject matter can be scary for little ones, but this book makes volcanoes plain and simple. And INTERESTING. My little first-grade scientist has read this many times.

This book is informative and easily read. I used it with my second language learners to support the earth science unit I was teaching in 4th grade. The photos and illustrations are excellent. It is well organized, and exciting. It is an Accelerated Reader book so the students can take a vocabulary test and a comprehension test on line to demonstrate what they learned and to win points. Even my most recent immigrants could read it and earn their 0.5 points in comprehension. Good book!!

My 5 yr old reads this by himself. It has details that are not too complicated for him to understand. He tells me what he read without getting overwhelmed with information. Recommended reading for 5-8 yr olds
