Customer Reviews

I highly recommend this for the little dinosaur enthusiasts in your life! My two love it! We try to snag any of the Discovery Kids books that we come across. Not too loud and noises don't come out scratchy. Great price, fast shipping. Couldn't be happier!

It's hard for me to write an accurate review on this product, as when I received it it came with dead batteries. So I don't know exactly what it's going to sound like yet until I can find the type of batteries it takes. After trying it once without it working I realize that it did have the little plastic strip that keeps batteries from being worn out comma yet it still doesn't work after removing it.

Beautifully designed book, with bright colors and cool sound effects. My 17 month old son doesn't seem interested in this book at the moment, but I'm sure he'll love it when he's a bit older.

Got this for my son for Christmas. He's big into dinosaurs and this book was such a hit! He loves

looking at the photos and pushing the buttons to hear the different dino noises.

Purchased this for my cousin's son who is into dinosaurs and it was a hit! The sounds are so awesome and the book is great quality!

Fun learning book. 2.5 year old boy not so interested in this book right now. Gets a little scared with some of the noises.

The first book was sent and one of the Dino's pages was ripped and they sent me a new one very fast and with no problems very nice people but the second one came in and the binding that holds the book together was torn about an inch and a half I decided to just donate both books to the goodwill and got my nephew a different Dino toy! Book was cute tho plays Dino noises for each Dino in the book and cute pictures...

My little niece love dinosaurs.. So when she got the book.. She wanted to have it read to her often.. Parents love me for it.. But they were glad she liked it...
