Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

I love these guides, I have a dozen, and I love them. They're small, but fold out big. A dozen doesn't

weigh a pound, so it's an easy carry, and the guide is very easy. It's not like reading a textbook. If you'd like to identify your surroundings, these are the way to do it.

A bit pricey, but also very handy. I purchased this guide for my grandson who loves the pictures and reading about each seashell with his parents and grandparents.

Great, simple guide. Love that it is laminated, so we can take it to the beach with us.

great chart

got an extra for a friend==great quick ref. guide
