Phoebe Lindsey Barton, PhD, is a professor in the School of Medicine at the University of Colorado

Health Sciences Center, Denver. She is director of the Master of Science in Public Health (MSPH) program and teaches courses in health care systems and health services research. Prior to coming to Colorado, she was on the faculty of the University of California, Los Angeles School of Public Health.

Great Book!

The book was very helpful and easy to look thru.

good book for Healthcare administration

For such a dry subject, Ms Barton did a nice job of presenting the information in an organized manner without getting "bogged down" in minutia. For my own needs, I found little benefit from all of the grafts and visuals. But in fairness, I understand their purpose. Her narrative was more helpful to me in preparation for Nurse Case Management Certification.

I LOVE

A great textbook to develop a deeper understanding of the U.S. Healthcare system.

It is very cheap to compare with the new one. Love it.

This book has a lot of information in it. Somewhat difficult to find if you are doing an open book test so I suggest you have a system on how to find things. But it was informative and the colors were easy to see. Lots of graphs. I got an A in the class.
