Maxillofacial Rehabilitation: Prosthodontic And Surgical Management Of Cancer-Related, Acquired, And Congenital Defects Of The Head And Neck (Amg All Music Guide)

Synopsis

The rehabilitation of patients with disabilities of the head and neck secondary to acquired and congenital defects continues to be a challenge. Today it is possible to restore most patients to nearly normal form and function, enabling them to lead useful and productive lives. However, successful outcomes require close interaction among many health care disciplines. Given the recent advances in maxillofacial prosthetics and reconstructive surgery, the pace of change in the rehabilitation of oral and facial defects has been far too slow. For example, free tissue transfers have been used throughout the world for the last 20 years to restore bony defects of the mandible, but far too many surgeons fail to understand that it is equally important to restore the bulk and contour of the tongue if the oral functions of speech, mastication, and control of saliva are to be restored. This updated edition with an emphasis on a truly multidisciplinary approach provides the reader with insights into the latest developments in maxillofacial prosthetics, reconstructive surgery, and dental care. New chapters present information on digital technology and tissue engineering, and all chapters have undergone significant revision, reflecting the advances in the use of osseointegrated implants and free vascularized flaps. The reader will take away practical knowledge of state-of-the-art treatment approaches to ensure that patients of the future will no longer assert that the cure was worse than the disease.

Contents

1. Oral Management of Patients Treated with Radiation Therapy and/or Chemoradiation J. Beumer III, E. Sung, R. Kagan, K. Lyons, H. Gulbransen, B. Venkatachalam, N. Ghaem-Maghami
2. Rehabilitation of Tongue and Mandibular Defects J. Beumer III, M. Marunick, S. Silverman Jr, N. Garrett, J. Rieger, E. Abemayor, R. Penn, V. Nabili, R. Rezaee, D. Curtis, A. Hannam, R. Nelson, E. Roumanas, E. Freymiller, B. Markowitz
3. Rehabilitation of Maxillary Defects J. Beumer III, M. Marunick, N. Garrett, D. Rohner, H. Reintsema, E. Abemayor, R. Penn, V. Nabili, P. Bucher
4. Rehabilitation of Soft Palate Defects S. Esposito, J. Rieger, J. Beumer III
5. Rehabilitation of Facial Defects J. Beumer III, D. Reisberg, M. Marunick, J. Powers, S. Kiat-amnuay, R. van Oort, Y. Zhao, G. Wu, L. Eversole, H. Cherrick, E. Roumanas, D. Pedroche, T. Baba, J. de Cubber, P. Moy, W. Noorda, G. van Dijk
6. Rehabilitation of Cleft Lip and Palate and Other Craniofacial Anomalies A. Sharma, T. Chang, L. Brecht, L. Kaban, K. Vergervik
7. Digital Technology in Maxillofacial Rehabilitation J. Wolfaardt, B. King, R. Bibb, H. Verdonck, J. de Cubber, C. Sensen, J. Soh
8. Tissue Engineering of Maxillofacial Tissues M. Lee, B. Wu
9. Psychosocial Perspectives on the Care of Head and Neck Cancer Patients D. Rapkin, N. Garrett
10. Oral Management of Chemotherapy Patients E. Chung, E. Sung

Customer Reviews

This is a very good comprehensive text to have as a reference and has many excellent contributions from many well-known authors. The text can serve any dentist who might see a patient who has had or will have treatment with chemotherapy and radiation therapy and/or has a maxillary or mandibular defect that requires restoration and maintenance. --Robert Schneider, DDS, MS, FACP, - Special Care in Dentistry, May/June 2012 This is a beautifully constructed textbook from start to finish which presents a range of techniques in an accessible and informative manner. A valuable source of referral for anyone involved in maxillofacial rehabilitation, it certainly helps somewhat to diffuse the infamous phrase "the cure was worse than the disease". --D. Brierley, - British Dental Journal, April 2012 This is one of the rare textbooks that I think should be used in the part of the formal educational curriculum (predoctoral, postdoctoral, and continuing) on the dental and surgical management of maxillofacial defects, particularly the section on the irradiated oncology patient. The book is of sufficient importance that readers should be willing to purchase a personal copy, and it should certainly be present in all dental and medical libraries. --Michael D. Turner, DDS, MD, FACS, - Journal of Dental Education, June 2012

This book has enough detail for a "beginner" in maxillofacial to be able to perform the prosthodontics procedures. Have not read the whole book yet, but a search of the internet revealed that a current text on this subject was sorely needed. I have met the author many years in a course

and am pleased that he took the time to write this.

good book
