"Merrell, Ervin, and Gimpel Peacock have greatly extended the value of their contributions to the field with this second edition. It provides expanded content in several key areas, including response to intervention. The chapter on working with culturally and linguistically diverse students is particularly strong and provides beginning practitioners with a solid framework for practice. This important text will continue to be a relevant, 'high-value' addition to the required reading list for beginning and intermediate-level students in school psychology."--Daniel Olympia, PhD, Department of Educational Psychology, University of Utah "This is a great text for introducing

students to the roles and functions of the school psychologist. The authors have done an outstanding job of providing a solid and complete foundation for school-based service delivery. I have used this text in graduate training and look forward to incorporating the updated second edition into my courses. I particularly appreciate the expanded discussion of multi-tiered service delivery frameworks, such as response to intervention."--Sandra M. Chafouleas, PhD, Neag School of Education, University of Connecticut "The second edition of *School Psychology for the 21st Century* builds on what was already an excellent, comprehensive text. Updated and expanded coverage of the impact of IDEIA reauthorization, professional ethics, and a number of other key areas keeps the material timely and useful. Thankfully, the book retains all of the elements that make it the selection of choice for most Introduction to School Psychology courses."--T. Chris Riley-Tillman, PhD, Department of Educational, School, and Counseling Psychology, University of Missouri--Columbia "This book offers a comprehensive overview of the field, highlighting the critical role that school psychologists play in supporting the academic performance and behavior of all students. The second edition adds information about the expansion of culturally relevant practices, prevention, and the emphasis on system-level change. Graduate students, undergraduates, and practitioners interested in the evolution of school psychology will benefit from reading this outstanding work."--Wendy M. Reinke, PhD, Department of Educational, School, and Counseling Psychology, and Co-Director, Missouri Prevention Center, University of Missouri--Columbia "This second edition provides an important update regarding the contextual factors (for example, economic, political) that influence the practice of school psychology. The comprehensive nature of the entire text and the depth found in individual chapters provide an exceptional introduction to school psychology. The text goes beyond the history of the field, asking readers to consider how current issues will affect future practices and professional roles. This book is an excellent match for Introduction to School Psychology and related courses. The questions at the end of each chapter are carefully worded to stimulate meaningful discussions and further exploration of important issues. I honestly had a hard time putting this book down."--Ellie L. Young, PhD, Department of Counseling Psychology and Special Education, Brigham Young University

Kenneth W. Merrell, PhD, until his death in 2011, was Professor of School Psychology and Director of the Oregon Resiliency Project at the University of Oregon. For 25 years, Dr. Merrell's influential teaching and research focused on social-emotional assessment and intervention for at-risk children and adolescents and social-emotional learning in schools. He published over 90 peer-reviewed journal articles; several books and nationally normed

assessment instruments; and the Strong Kids programs, a comprehensive social and emotional learning curriculum. Dr. Merrell was a Fellow of the Division of School Psychology (Division 16) and the Society for Clinical Child and Adolescent Psychology (Division 53) of the American Psychological Association. He received the Senior Scientist Award from Division 16, the Division's highest honor for excellence in science.

Â Ruth A. Ervin, PhD, is Associate Professor of School Psychology and Special Education at the University of British Columbia, Vancouver, Canada. Her professional teaching and research interests lie within the domains of promoting systems-level change to address research-to-practice gaps in school settings; collaborative consultation with school personnel, parents, and other service providers for the prevention and treatment of emotional and/or behavioral disorders such as attention-deficit/hyperactivity disorder and oppositional defiant disorder via a data-driven, solution-oriented problem-solving approach; and linking assessment to intervention to promote academic performance and socially significant outcomes for school-age children. Emphasis in Dr. Ervin's work has been placed on systems-level change and the merging of research and practice agendas to support school personnel in the timely provision of primary, secondary, and tertiary prevention efforts to address student needs.

Â Gretchen Gimpel Peacock, PhD is Professor and Department Head of Psychology at Utah State University. She served as program director of the School Psychology Program from 1997 to 2009. Her research, publications, and professional presentations focus on child behavior problems and associated family issues, as well as professional issues in school psychology. She serves on the editorial advisory boards of several school psychology and related journals. Dr. Gimpel Peacock is coauthor of *School Psychology for the Twenty-First Century, Second Edition*, and *Emotional and Behavioral Problems of Young Children, Second Edition*, and coeditor of *Practical Handbook of School Psychology*, among other books.

While this is the most popular book for introductory school psychology courses, I found there wasn't much information offered that wasn't obvious to people who are even slightly knowledgeable about the job. I'm a research psychologist who was interested in looking into school psychology and so picked up this book hoping to learn about what it takes to become a school psychologist and what working in the field would be like. I read the book cover-to-cover and found pretty much all of it to be completely obvious. I found more helpful information looking up the "school psychology" into Wikipedia. The book does a decent job outlining what it takes to become a school psychologist, but doesn't offer much in-depth information on what the job entails. Perhaps this is because the field is

so large with so many varied occupations and this book is for as broad an audience as possible. If you're interested in becoming a school psychologist, I suggest getting a book specifically on the exact job you're interested in, whether it's assessment, research, administration, etc. A book this broad is not helpful unless you have no idea about the field and, in that case, just do a bit of researching online for free.

Many parts feel like they could be significantly shorter without sacrificing content, but otherwise this is a very good and well-researched intro to the field.

Good and very clean Thank you

Condition of a new book. Helps future psychologists to understand the past role of school psychologists into the present and probabilities of the future of school psychologists.

interesting

As a first year graduate student, this book has been great. It has a good layout and is full of good information.

Good

OK.
