Customer Reviews

James W. Kalat received his B.A. degree from Duke University, Summa Cum Laude, and then continued his education at the University of Pennsylvania, receiving his Ph.D. in psychology under the supervision of Paul Rozin. Currently, Dr. Kalat is at North Carolina State University where he is a professor of psychology, teaching both introductory psychology and biological psychology. In addition to having authored the best selling biological psychology text, Dr. Kalat is the author of INTRODUCTION TO PSYCHOLOGY, 9th Edition (Wadsworth, 2011) and has published articles on a variety of diverse topics such as taste aversion learning and on the teaching of introductory psychology. A talented and frequently requested speaker, Kalat receives rave reviews wherever he presents, including the National Institute on the Teaching of Psychology and the Texas Community College Teachers Association.

I bought this book a few weeks before final exams. Thanks to it, I passed. The book is set out well, there are plenty of practice questions in multiple styles (e.g. true/false, multiple choice, short

answer). Another great thing I found out when I received the book is that the pages are perforated so you can tear them out if you want and have bundles of study notes on hand. Great study guide, I'd recommend it to anyone at uni.

I bought this book for a mid level psychology class and it helped more to use the book website because it gave quizzes on the main topics which I used as my primary study aide for exams. It didn't go into too much detail that you were overwhelmed, it just brushed over a little of the basics without too much theory.

Product and service just as described.

This was not a good study guide. It was confusing and didn't help whatsoever.

Excellent

Worked for the class I was taking at the time,,,

A+

Not impressed. It was the wrong edition. 10th not 11th like the text which by the way \$204 is overpriced!!!! But the study guide is not in the condition advertised and has torn pages.

Disappointed!
