This text offers current thinking in the field. The authors are well-established qualitative researchers and have pulled off a great text for the beginning researcher. --Matthew A. Eichler (10/28/2011)"The key strength of this text is the discussion and presentation of how to think about qualitative research. This is the only text that discusses the process of thinking before doing at any stage of the research project from the general idea to the writing up and submitting for publication. This kind of discussion is extremely helpful for novice or experienced researchers as it helps them to take a step back in the middle of the research process, rethink clearly and improve the project. --Ruth Segal (10/28/2011)"This book combines the basics of qualitative research methods (why we choose qualitative over quantitative when we are trying to answer specific questions about human behavior) and the nuts and bolts of how to actually do qualitative research. I like that it explains qualitative research from conceptualization to writing up the results. Not a lot of textbooks accomplish this they

allude to a lot, but they don't include the necessary information that this textbook includes. --Rhonda R. Buckley (10/28/2011)"The text is very clear and well organized, and accessible for new students. In comparison to many other introductory texts, it really brings to the fore the need for theoretical and methodological coherence. --Irina L. G. Todorova (10/28/2011)"An invaluable introduction to qualitative inquiry that emphasizes several points that I rarely find in other texts and, although somewhat subtle, they are extremely important for doing rigorous research. --Sandra Mott (10/28/2011)" This text offers current thinking in the field. Very clear and easy to read guide

Required for graduate Qualitative Research methods course. Moderately helpful.

Excellent read! Accurate, succinct and interesting presentation regarding qualitative research.

I purchased this book as a required textbook for my qualitative research course, but I don't feel it's a good one.

This book was in good shape as described, I am including these next few words because it requires it. That needs to be changed.
