Roger Tory Peterson, one of the world's greatest naturalists, received every major award for ornithology, natural science, and conservation as well as numerous honorary degrees, medals, and citations, including the Presidential Medal of Freedom. The Peterson Identification System has been called the greatest invention since binoculars. These editions include updated material by Michael O'Brien, Paul Lehman, Bill Thompson III, Michael DiGiorgio, Larry Rosche, and Jeffrey A. Gordon. John Aubrey Douglass is the author of the Peterson Field Guide to Atlantic Coast Fishes and the Peterson First Guide to Shells.

Great. The color plates are really helpfull.

great little book. now we can fish safely, and se if the fish we get can be eaten.

This is a great field guide. Though some would like full color illustrations, variability in coloration

occurs quite often in fish depending on habitat and other factors. The text descriptions are quite clear. The only complaint I have, is the binding isn't very sturdy. I'm on my 4th copy! My field guides go into the field (or in this case on the boat) where the elements will take their toll very quickly on poorly constructed material.

Product and service from the vendor exceeded my expectations. Highly recommend. Would use again with no hesitation..

love the color inserts - this really helps to identify those fish that look so much alike when you are way out in the boat... gotta study up for my next fishing trip :)

Accurate and very handy, beautiful illustrations and colours, so I can enjoy the fish even more and I know where I am talking about

I like this guide because it gives good information on coastal fishes of the Atlantic shores of the USA good reference material for my European studies

This was a gift and he loves it
